

## Erratum: From bench to *in silico* and backwards: What have we done on genetics of recurrent pregnancy loss and implantation failure and where should we go next?

In the article “From bench to *in silico* and backwards: What have we done on genetics of recurrent pregnancy loss and implantation failure and where should we go next?”, with DOI code number <https://doi.org/10.1590/1678-4685-GMB-2023-0127>, published in the Genetics and Molecular Biology, 46(3 Suppl 1): e20230127 (2023):

Where it was written:

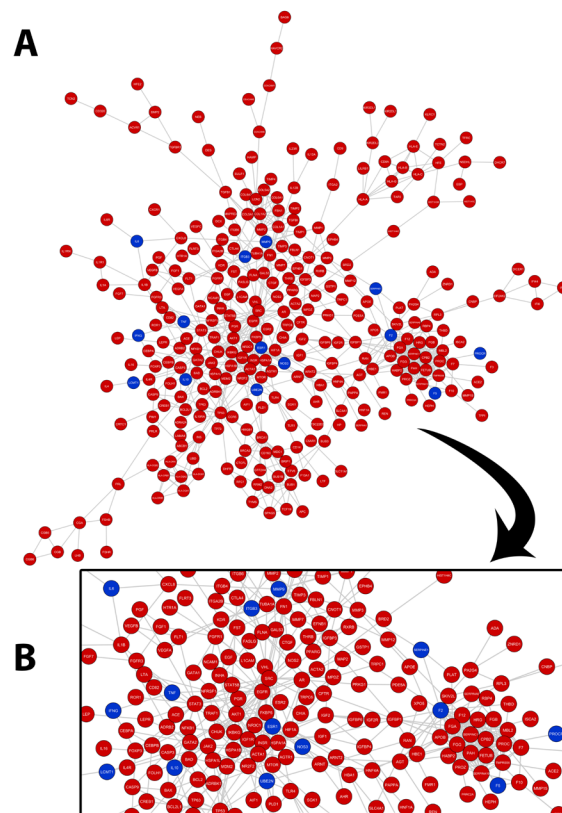

**Figure 2** – Protein-protein interaction network for the genes obtained from database review (A). Genes registered as associated with recurrent pregnancy loss are represented in red, whilst genes registered for both recurrent pregnancy loss and implantation failure are represented in blue (B).

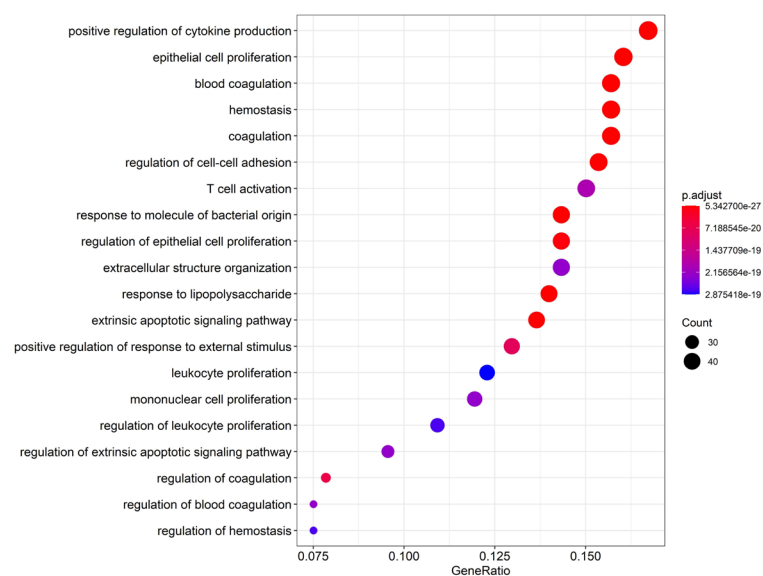

**Figure 3** – Main enriched Gene Ontologies (GO) by adjusted P-Value.

Should read:

**Figure 2** – Protein-protein interaction network for the genes obtained from database review (A). Genes registered as associated with recurrent pregnancy loss are represented in red, whilst genes registered for both recurrent pregnancy loss and implantation failure are represented in blue (B).
