Maira Mitsue Mukai ¹

Dear Dr. Ana Maria Tchorobay,

In reference to the comments made, in paragraph 7, page 267, and in figure 1, changes such as onycholysis, splinter hemorrhages, subungueal hyperkeratosis and oil drop originate in the nail bed; other changes originate in the nail matrix. I'd like to kindly request that the readers reconsider the errata in reference to this paragraph and figure. However, I agree

that the term *nail bed*, rather than *nail plate*, is more appropriate. I'd like to thank you for pointing this out, which led to the correction of the mistake.

Sincerely,
Maira Mitsue Mukai

¹ Assistant Professor of Dermatology, Federal University of Parana (UFPR) – Curitiba (PR), Brazil.

Erratum

Errata

This erratum refers to the article Acne and diet: truth or myth? *An Bras Dermatol.* 2010;85(3):346-53. Figure 1 was published without the subtitle. Follows the missing information:

Adapted and translated from Smith RN, Braue A, Varigos GA, Mann NJ. The effect of a low glycemic load diet on acne vulgaris and the fatty acid composition of skin surface triglycerides. *J Dermatol Sci.* 2008;50(1):41-52.
