Transcranial direct current stimulation effects in subjects with motor language disorders (Abstract)*. Theses. Salvador, 2010.

Camila Vila-Nova**

Background: Aphasia is among the most disabling deficits after stroke. Despite the importance of aphasia in neurological clinical practice, and given the limited number of controlled studies, most patients are treated only partially and for a limited time. In the last two decades non-invasive brain stimulation techniques as transcranial direct current stimulation (tDCS) have been developed. tDCS is a technique for modulating brain function.

Objective: To investigate the tDCS effects in motor language abilities from subjects with chronic expressive aphasia.

Method: A cross-over trial, double-blinded, placebo-controlled was developed. A group received anodic tDCS

in Broca's area (1mA) for ten days consecutively; the other group received placebo in the same conditions. Finally, those that received anodic tDCS now received placebo and vice versa.

Results: Twelve subjects with chronic expressive aphasia completed the study. They showed improvement in articulation of words after anodic stimulation ($p=0.01693$, $V=43$). Four subjects were capable of repeating words immediately after anodic stimulation and preserved this ability when re-assessed at the one week and six months follow-ups.

Conclusion: Results suggest that tDCS in Broca's area can improve motor patterns of language.

Key words: Aphasia, transcranial direct current stimulation, language disorders, stroke, Broca's area.

THESES divulga os resumos em inglês de teses defendidas e aprovadas. O assunto da tese deve estar relacionado a aspectos clínicos ou experimentais de interesse em neurologia, neurociências e psiquiatria. O Autor deve encaminhar ao Editor: abstract da tese, acompanhado do título em inglês e key words. Adicionalmente, o Autor deve informar: a natureza da tese (Dissertação/Tese de Mestrado, Tese de Doutorado, Tese de Livre-Docência – como exemplares); nome da instituição na qual foi defendida e respectiva área de concentração; nome do orientador, quando for o caso; endereço postal e eletrônico (e-mail). Enviar para: <http://submission.scielo.br/anp> ou por e-mail (arq.neuropsiquiatria@terra.com.br).
