Araújo APQC, Nardes F, Fortes CPDD, Pereira JA, Rebel MF, Dias CM, et al. Brazilian consensus on Duchenne muscular dystrophy. Part 2: rehabilitation and systemic care. *Arq Neuropsiquiatr*. 2018 Jul;76(7):481-489.

DOI: <https://doi.org/10.1590/0004-282X20180062>

In *Rehabilitation*, where it is written:

Noninvasive respiratory support has increased DMD survival in the last two decades. A tracheostomy is preferred because it is less invasive, more comfortable and maintains speech capacity.

Should be:

Noninvasive ventilatory support has increased DMD survival in the last decades. Noninvasive ventilation is preferred to tracheostomy because it is less invasive, more comfortable and maintains speech capacity.
