

BRAZILIAN JOURNAL OF BIOLOGY®

VOLUME 74

MAY, 2014

NUMBER 2

EDITORIAL NOTE

The *Brazilian Journal of Biology* is preparing three special numbers for 2014 and early 2015. One refers to the Belo Monte Reservoir located in the Xingu River in collaboration with Norte Energia. Two other special numbers are a collection of papers covering the Rio do Sinos watershed, elaborated in collaboration with University Feevale.

The distribution of printed volumes of the *Brazilian Journal of Biology* will be restricted to Universities which have the annual subscription. Since the papers are easily accessed from SciELO, the Editorial Board considers it sufficient for associates to access the whole content of the journal from that site. Authors will continue to receive a printed copy of the journal that contains their published papers.
