ANALYSIS OF FISH ASSEMBLAGES IN SECTORS ALONG A SALINITY GRADIENT BASED ON SPECIES, FAMILIES AND FUNCTIONAL GROUPS

Na pág. 252

Onde se lê:

Fig. 1. Multidimensional ordination (MDS) based on the presence/absence of families between three salinity sectors (E = euhaline; P = polyhaline; M = mesohaline).

Leia-se:

Fig. 1. Location of the sampling sites in the euhaline (E1-E15), polyhaline (P1-P20) and mesohaline (M1-M18) sectors of the east-west axis of the Paranaguá Estuarine Complex.
