DIÁLISE NO PACIENTE IDOSO: UM DESAFIO DO SÉCULO XXI - REVISÃO NARRATIVA

Marcia Regina Gianotti Franco, Natália Maria da Silva Fernandes

On Page 138, the paragraph below:

Therefore, today 'fistula first' is the main recommendation for all patients on HD.<sup>78</sup> As far as location goes, some authors have shown that the most distal (radiocephalic), when compared to the brachiocephalic, have lower success rates in elderly patients (one year patency of 81% vs. 66%, respectively); AV fistulas in the arm have been considered.<sup>79</sup>

Should read:

Therefore, today 'fistula first' is the main recommendation for all patients on HD.<sup>78</sup> As far as location goes, some authors have shown that the most distal (radiocephalic), when compared to the brachiocephalic, have lower success rates in elderly patients (one year patency of 66% vs. 81%, respectively); AV fistulas in the arm have been considered.<sup>79</sup>
