

## Addendum

In the original article titled 'A new species of *Loimia* (Annelida, Terebellidae) from Papua New Guinea, with comments on other species recorded in the region', with the DOI code <http://doi.org/10.1590/2675-2824072.23057>, published in Ocean Coastal Research 2024, v72(suppl1):24003, the addition of the following information must be considered:

"LSID urn:lsid:zoobank.org:pub:DAF39936-B3B6-4EB0-BF71-48B7731273BB"

Adding the information is necessary because the LSID number provided registers the scientific names for *Loimia lanai* n. sp., representing a nomenclatural act governed by the ICZN Code of Nomenclature. It should be read after the subtopic "*Loimia lanai* n. sp."
