

Corrigendum

<http://dx.doi.org/10.1590/1516-4446-2019-0002>

The authors of article titled “Normative data of the Barratt Impulsiveness Scale 11 (BIS-11) for Brazilian adults” (<http://dx.doi.org/10.1590/1516-4446-2014-1599>), Leandro F. Malloy-Diniz et al., published in the *Brazilian Journal of Psychiatry*, 2015, volume 37, issue 3, pages 245-8, have identified errors in Table 1. Below we reproduce the correct version of the table.

Table 1 Performance of Brazilian adults on the BIS-11 scale: interpretative parameters

	Vasconcelos et al. ¹³			Patton et al. (2nd order) ¹⁰			Patton et al. (1st order) ¹⁰					
	Total	Inhibition control	Non-planning	Attentional	Motor	Non-planning	Attention	Cognitive instability	Motor	Perseverance	Self-control	Cognitive complexity
Items	30	20	8	8	11	11	5	3	7	4	6	5
Min-max	30-120	20-80	8-32	8-32	11-44	11-44	5-20	3-12	7-28	4-16	6-24	5-20

Percentile 15	52	31	14	13	15	21	8	4	9	5	10	9
Percentile 20	53	32	14	14	16	22	8	5	10	5	10	10
Percentile 25	55	33	15	14	17	22	9	5	10	6	11	10
Percentile 30	56	34	16	15	17	23	9	5	11	6	12	11
Percentile 35	58	35	16	15	18	24	9	6	11	6	12	11
Percentile 40	59	36	17	16	18	24	10	6	12	6	13	11
Percentile 45	60	37	17	16	19	25	10	6	12	6	13	12
Percentile 50	62	38	18	16	19	25	10	6	12	7	13	12
Percentile 55	63	39	18	17	20	26	11	6	13	7	14	12
Percentile 60	64	40	19	17	20	27	11	7	13	7	14	13
Percentile 65	65	41	20	18	21	27	11	7	14	7	15	13
Percentile 70	67	42	20	18	21	28	12	7	14	8	15	13
Percentile 75	68	43	21	19	22	29	12	8	15	8	16	14
Percentile 80	70	45	22	20	23	30	13	8	15	8	16	14
Percentile 85	72	47	22	21	24	31	13	8	16	9	17	15
Percentile 90	76	50	23	22	25	32	14	9	16	9	18	15
Percentile 95	80	54	25	24	28	34	16	10	18	10	19	16
Percentile 99	90	60	28	28	32	37	18	12	23	12	22	18

Higher BIS-11 scores are indicative of higher impulsivity.
 Alpha = Cronbach's alpha; Min-max = minimum-maximum; SD = standard deviation.
