

The third volume of the CEFAC Journal consists of 25 scientific contributions, being 19 original articles, 1 opinion text, 3 case reports and 2 review articles in the fields of audiology, language, public health, orofacial motricity and voice.

As for the original articles, the first study is by **Neto, Stroppa, Parrera, Maximiano** and **Hidalgo**, about *Vestibular rehabilitation in patients with benign paroxysmal positional vertigo*. The second study is by **Cortes-Andrade, Bento** and **Lewis** on *Otoacoustic emissions evoked by transient stimuli: newborn hearing screening protocol*. **Alves, Rossi, Pranke** and **Lemos**, present the third study on the *Influence of gender on postural balance of school aged children*. **Fernandes, Gil, Santa Maria** and **Azevedo** present the fourth study on *Evoked Brainstem Response by bone in individuals with sensorineural hearing loss*. The fifth study is by **Braga, Martins, Queiroz** and **Câmara** on the *Profile of Speech Language Pathology's market at audiology clinic*. **Sagrilo** and **Ferreira** present the sixth study on the *Difference between verbal and visual span on genres: a pilot study*. *The augmentative alternative communication in the therapy session* is the seventh contribution by **Bortagarai** and **Ramos**.

The eighth study is on the *Occurrence of repair strategies for plosive, considering the degree of phonological disorder* by **Berticelli** and **Mota**. **Perilo, Freitas, Cardoso, Motta** and **Alves** present the ninth study on the *Cognitive-linguistic skills and their relation to respiratory characteristics*. The tenth study is presented by **Salvador, Tessitore, Pfeilaticker, Pascoal** and **Nemr** on the *Measurement with a digital caliper in Bell's Palsy*. The eleventh study is by **Martinelli, Marchesan** and **Berretin-Félix** on the *Assessment protocol of lingual frenulum to infants: relationship between anatomical and functional aspects*. The twelfth contribution by **Manzi, Peyneau, Di Ninno, Lopes, Silveira** and **Machado** discusses *The relationship between temporomandibular joint disorders and tubal dysfunction in cleft patients*.

*Children who use Cochlear Implant present different vocal parameters to the vocal parameters of children using hearing aids* is the thirteenth study by **Souza**. The fourteenth study is by **Christmann, Scherer, Cielo** and **Hoffmann** on the *Maximum phonation time of future voice professionals*. **Ribeiro, Gama, Bassi** and **Teixeira** present the fifteenth study on the *Speech Language Pathology treatment on dysphonia: Vocal, laryngeal and self-perception parameters*.

The sixteenth contribution by **Costa, Lacerda** and **Marques** is on *Noise in the hospital environment: impact on the health of nurses*. The study entitled *Prenatal care in the perception of postpartum women from different health services* is the seventeenth contribution by **Ceron, Barbieri, Fonseca** and **Fedosse**. **Menezes, Barbosa, Souza, Freire** and **Garcia** present the eighteenth study entitled *Occurrence of rhinitis, mouth breathing and orofacial alterations in adolescents with asthma*.

The authors **Ferreira, Silva, Martins-Reis, Friche** and **Santos** present the nineteenth study on the *Distribution of Speech Language Pathology in health care in the state of Minas Gerais from 2005 to 2010*. The twentieth study is a case report on *Phonological therapy with computer use: case report* authored by **Pereira, Brancalioni** and **Keske-Soares**. The twenty-first contribution is by **Mazzochi** and **Aita** on *Directionality and Speech Recognition in Noise: study of four cases*.

The twenty second contribution is about the description of a *Electropalatography study of nasal phones produced by individuals with cleft lip and palate* by **Jesus** and **Reis**. The review article entitled *Influence of levodopa on the oral phase of swallowing in patients with Parkinson's disease* is the twenty-third study presented by **Mancopes, Busanello-Stella, Finger, Neu, Pacheco** and **Torriani**.

The twenty-fourth is a review article on the *Medical and phonoaudiology treatment of spasmodic dysphonia* by **Fabron, Nóbile, Viviane Marino, Sebastian** and **Onofri**. The opinion text entitled *Specific language impairment: the relevance of initial diagnosis* by **Oliveira** and **Schier** is the twenty-fifth and final scientific contribution of this volume.

I conclude this editorial calling the reader's attention to one more change which will occur in this journal. From the next edition on, there will be an increase in the number of scientific contributions published in order to not only reduce the waiting time of the publication of articles by the authors, but also increase the visibility of studies done and developed in the Speech Language Pathology in the different fields.
