☛ **CHANGES IN INSTRUCTIONS TO AUTHORS OF THE JOURNAL OF THE BRAZILIAN SOCIETY OF TROPICAL MEDICINE, AIMED AT THE ADOPTION OF XML-SCIELO MARKUP, VIA PUBMED CENTRAL**

With the aim to adapt the Journal of the Brazilian Society of Tropical Medicine to the necessary requirements for the adoption of PubMed Central's Markup system (XML-SciELO), we support changes in the instructions to authors, especially in the minimum quality required for authors in the submission of figures. From the next issue (July-August), these figures should be at least 600dpi, preferably between 900-1200dpi.

The Journal of the Brazilian Society of Tropical Medicine's instructions to authors are available on the following websites: <http://www.scielo.br/revistas/rsbmt/iinstruc.htm> and www.rsbmt.org.br

The XML markup system is used by leading international publications, and the Journal of the Brazilian Society of Tropical Medicine will be among the national journals chosen to adopt this system. This will permit it to improve the display quality of the articles, increasing visibility and access to the journals by the international community and, furthermore, that the files may be displayed on e-books, tablets, and smartphones, generating files in different formats.

SCIENTIFIC MEETING

☛ **XXX BRAZILIAN ANNUAL MEETING OF APPLIED RESEARCH ON CHAGAS DISEASE XVIII BRAZILIAN ANNUAL MEETING OF APPLIED RESEARCH ON LEISHMANIASIS**

Preliminary information

Coordinator: Prof. Dr. Walderez Ornelas Dutra

Universidade Federal do Triângulo Mineiro, Uberaba, MG, Brasil.

17-19 November 2014
